

MAP to the Cloud: Navigating Migration with **Dedicatted on AWS**

USE DEDICATTED EXPERTISE AND AWS BEST PRACTICES TO DESIGN, PLAN AND EXECUTE YOUR CLOUD MIGRATION

WHAT IS AWS MAP?

The AWS Migration Acceleration Program (MAP) streamlines your cloud adoption of AWS services and best practices. Assess your current workloads, calculate the costs, benefits, and risks of adoption, develop your expertise, test workloads, and get financial assistance.

MAP PHASES

ASSESS

Create a case for change

- Understand and document your current state
- Deploy and run discovery tools (where needed)
- Provide high-level design
- Provide a migration plan and strategy
- Provide a business case

MOBILISE

Start bringing your services in AWS

- Create a detailed design for Landing Zone and the initial deployment
- Validate migration plans, strategies and move groups
- Deliver first migrations or workloads and services into AWS
- Validate your business case, including future state and planned migration costs

MIGRATE & MODERNISE

Execute on migration strategies

- Migrate your data
- Build & evolve security services
- Automate services & modernise applications
- Operate & optimise towards cloud native services
- Rehosting, refactoring, and modernizing to adopt new technologies

BENEFITS OF MAP

Budgets and TCO

A map assessment helps estimate future TCO, building a strong business case for migration, which is often the most challenging part.

Cost optimization

MAP Identifies Cost-Saving, Optimization Recommendations, And Partner Investment Programs Or Service Credits.

Risk reduction

MAP assessments are key to reduction strategies. Brand damage and loss of revenue for businesses means failure is not an option.

Readiness and capabilities

This is essential for the complete success of your migration project

Database and optimization

MAP offers insights for optimizing database workloads and license requirements, reducing costs.

Operational resilience and availability

Leverage modernization capabilities and improve security and availability.
